PRODUCT INFORMATION

Charger

Charge indicator highlights battery condition and cannot overcharge the battery using an auto-cut-off function. The unit is suitable for most worldwide voltages.

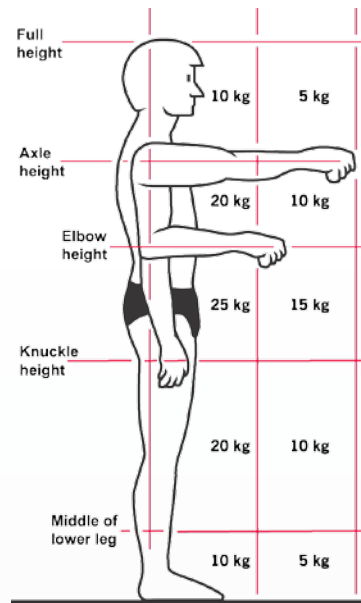

Perfect weight distribution

Due to the lifting mast unique positioning at the rear of the chassis Edmolift have achieved near perfect weight distribution providing unrivalled manoeuvrability. The 100% vertical mast eliminates problems such as platform drift found on other products.

Compact design

The WP features an extremely compact design which is also very easy to clean.

Consider manual handling legislation dictated by the Health & Safety Executive and EU Directives. Repeatedly lifting light items, awkward items and lifting them incorrectly can result in injuries.

Work Positioner - Data

| Model | Cap. kg | Max. height mm | Min. height mm | Outer dimensions, mm | | | Battery | Charger | Weight kg, pack in. | |

Safety regulations

The EdmoLift products comply with all safety regulations in accordance with EN 1757-1. The CE-mark on EdmoLift's products confirms that they are manufactured in accordance with applicable CE directives. Before deciding which model and design of lift table is required consider all the conditions. Stated max.capacity always regards evenly distributed load. If any accessories and special equipment are required please contact us for information and data.
